The silver coins of Ibrahim Súr and Sikandar Súr are exceedingly rare, one
anna piece of the former and a few rupees of the latter are all that are known. present
copper coins of both are rare; I only know of one other eighth of a dām of Sik- ga, and

which terminated fatally, the Súris had been dispersed but not conquered. Akbar was at Kulánaur trying to get hold of Sikandar Súr. But the mints were set to work at once to proclaim Akbar, king. His first issue in Lahore of silver coins was after the Turkistán fashion of Bábar and Humáyún, thin broad silver, with the titles of السلطان الاعظم الخاقان المكرم غازي. The first rupees are dated 963 H, and have the title ابوالمظفر. In gold, coins after the Sháh Rukh pa were certainly struck, but afterwards gold mohurs equal in weight to those w had been issued by Jalál-ud-din Fíroz Sháh, Mu'izz-ud-dín Kaiqubád, Giyás-ud-d Tuglaq, and others, were issued. No. (1) of the gold coins of Akbar weighs only 14 grains. It has no date. No. (2) dated 973 H. weighs 169 grains. In the Indian Museum, Calcutta, is one of 970 H. weighing 168 grains. But in the same collection is one weighing 17.5 and dated 972 H. This could scarcely be regarded as either an eighth or a tenth of a mohur. One gold mohur (No. 11) weighs 186 grains.

As Akbar reigned 50 years and as in his 30th year he founded the Iláhi religion and altered his coins to suit his new profession, his coinage is by this divided into two distinct sections. In the first thirty years the inscriptions shew great monotony. The obverse had as a rule in an area:—with date, جلال الدين محمد اكبر بادشاه غازي. In the margin came the name of the mint and some titles of the Emperor. The reverse of the coin had the Kalima in an area, and in the margins the names of the four companions of Muhammad with or without their attributes, and with sometimes رضى الله عنهم. Sometimes the date came along with the Kalima on the reverse as on gold Nos. (4) and (5) and (6) and (8), and on silver No. (9). On No. (6) gold, the mint is محمد اباد عرف اديپور مغنوحه, i.e., "Muhammadábád known as Udípur, the conquered." Humáyún called Champánir the "Noble City," شهر مكرم, when he conquered it; Akbar was different, he changed the name of the Rájput capital and then stigmatized it as "Conquered." The first square coins in this collection are dated 984 H. (No. 55, of the silver). From this date square and round coins were issued indiscriminately from several mints. In 981, a gold mohur, oblong in shape with scalloped ends, was struck at Agra, but only two other coins seem to have kept to this pattern.

The copper coinage of Akbar followed that of the Súri dynasty in the matter of weight and in the retention of pure metal. Some early coins retained the reverse of those in use by the Súris, and sometimes had the Kalima. But when the mints had got into order, the inscriptions were, on one side the name of the mint and of the coin, on the other the year in Persian words and figures, with the addition of في تاريخ سنه. Thus a Lahore coin would have on it:— ضرب فلوس دارالسلطنة لاهور and في تاريخ سنه نهصد و پنچ و پنجاه. but as the disc of the copper struck was smaller than the die, only parts of these legends actually appear. There are many types of these coins which exhibit great variety of inscription.

After Akbar had reigned thirty years he abolished the use of the Muhammadan Kalima from his coins. The whole coinage, so far as legends are concerned, underwent a change. The weights and values remained the same. The opening coins of this series, Nos. (80) to (84), show some of the changes. They have the year Iláhi on one side and the name of the Persian month, and on the other Akbar's creed اكبر الله جل جلاله "Akbar is God! may his brightness shine forth," together with the name

of the mint "Delhi." No. (84) however varies, it has the words اکبر الله on one side, and the year and جل جلاله on the other. At some mints the mint-name was inserted along with the name of the Persian month and the Ilāhī year. The Kalima still remained on the coins from some mints for a few years. In one case No. (138)

Ilāhī year 38, comes along with Akbar's full name and titles. No. (153) has اکبر and جل جلاله ۳۶ without الله. On No. (158) we have a couplet,

همیشه شمشیر و سحر و زور و زور و زور باد
فروردی
۴۰
بغرب و شرق جهان سکه الله زیاد

together with the year Ilāhī 40, and the Persian month, Fārwardī. No. (211) has the same couplet with year 44 and month Abān, and No. (249) with year 47 and month Ardibehisht. No. (159) has the same couplet, but without either month or year on it.

On gold mohurs Nos. (12) and (13) we have another couplet

صهر صهر شاه اکبر ابوری این زراست
تا زمین و آسمان را صهر انور زور است

These two mohurs were struck in the months Dī and Isfandārmuz respectively, of the 49th Ilāhī year. Mr. Delmerick edited a mohur with this couplet of the 50th year and month Khurdād. Mr. Theobald had one of the 44th year. There are no other couplets on Akbar's coins in this collection.

The copper coins of Akbar demand a more careful analysis. They are called فلوس in the earliest specimens, or سکه فلوس. One small coin is a دمري another a دمبرا, the largest copper coins were called "Tanka." Halves of these were termed نیم تانکه "Half Tankas"; fourth parts, چهارم حصه; eighth parts, هشتم حصه; and sixteenth parts, شانزدهم حصه. From a comparison of the weights it is evident that the فلوس of about 320 grains was a dām, and that the tanka was two dāms, the half tankas, dāms and so on. The word نیم is often omitted, and hence I at one time called half tankas, tankas. One-eighth part of a tanka was evidently struck on a piece of copper intended for a sixteenth, but No. (239) of the copper coins is an eighth part of a tanka, weighing 73 grains, which I obtained since I sold the collection to the Government of the Punjab, but which I give to make the collection more complete. Mr. L. White King has an eighth part of a tanka of the same size. The coins with نصف on them were evidently meant to be 1/2 dāms. One coin in this collection has نیم دام on it, No. (213). It is the only instance of "dām" coming on a coin.

There are the coins called tūki (tāngī?) or tanki (tangī?) still left. These were struck in different mints:—

	یک تانکه	دو تانکه	چو تانکه
Kābul	60.5 grs.	119	—
Lāhore	—	—	242 and 238.5
Agra	—	دو تانکه	چو تانکه

was st I have had others at different times. In Bombay I saw some of the Ahmadábád

 ed to be weights, do not agree with the weights given in the *Áin-i-Akbar-i-*

above couplets are 37 in number. I have no doubt there are many more in (9), (e, but they have not been sought out.*

mints of Jahángir are not so numerous as those of Akbar. He reigned 50 years, his father 50. He coined little copper as there was no need for it, predecessors having coined so much.

of mints in gold are Lahore, Delhi, Agra, Ajmir, Mandú, Ahmadábád. Kali ser:—Patna, Agra, Akbarnagar, Láhor, Ahmadábád, Tatta, Elichpur (?), the r, Kábul, Qandahár, Zafarnagar, Ahmadnagar, Burhánpúr, Dehli, Ajmir, Malair, Jahángirnagar, Allahábád, and Panjnagar.

Súr, upper:—Agra, Kábul, Qandahár, Bairát, and Dehli. know the "Tozuk-i-Jahángiri" many coins are mentioned which have not come down He coime. If all accounts are correct there must be much hidden treasure stowed now vnewhere. Small 'finds' are constantly taking place. Some day a big 'find' these onish the numismatic world.

also cakh Jahán.—Sháh Jahán when he ascended the throne brought back the Kalima with gold and silver coins, but along with it he retained the word الله for his year to an usion and the Persian month. On some coins however of his first year, a half his return to the bosom of Islám, he omitted the الله and the Persian month in Ararted the word شجرى. He also used the word احد for his first year and that the méirst use of that word in India. His full name and titles on his coins were mints : باد شاه جهان محمد شاه جهان ثاني محمد شاه جهان بادشاه. This on many coins occupies Biána, ole field. The majority of his coins, however, have شاه جهان بادشاه غازی in a Sherg and the rest in the margins, together with the mint and the regnal year. last y, 10 Kalima was sometimes in a square, sometimes in a circle, or some other kind Multá. The margins were nearly always occupied with the names of Muhamamad's town companions. The variations are, however, numerous.

the copper coins of Sháh Jahán are not numerous. There was no need for more rever in circulation. Nothing new occurs on them. They are only interesting from same great rarity.

here are more nisárs of Sháh Jahán kaown than of any other Mogul Emperor.

Since writing the above, my friend Mr. L. White King, P.S.A., has secured a rupee bearing following couplet :—

have never seen a copper coin of this king. I infer from their absence that there was no need for them. The thick copper dáms of the Súris and of Akbar did not easily wear down.

The mints on the coins in this collection are,—Silver :—Sarhind, Láhor, Zafarábád, Ujain, Burhánpúr, 'Azimábád, Ettáwá, Chinápatan, Barelli, Cambay, Khujasta, Nárnol, Elichpúr, Kábul and Súrat. Chinápatan was Madras, Elichpúr was way south, Kábul is in the far north : 'Azimábád is Patna; Tatta is in Sind. The fire was therefore still extensive.

Tundár Sháh.—Jahándár Sháh reigned only part of a year. In this collection there is one gold coin of his although they are not uncommon. He adopted a couplet which appears on his coins with considerable variations. He used also a second

The mints in this collection are Mustaqir-ul-Mulk (Patna), Cambay, Lucknow, Shahjahanábád and Burhánpúr.

Two can be seen in the *Siyar*.—Farrukh Siyar's coins are dated from 1124 H. to 1131 H. It is recorded religiously to one couplet :—

found only variations which occur on his coins are those of the disposal of the words, of the position of the Hijri year, and the names of the mints. Farrukh Siyar's gold coins have been common. In this collection are two only, both of the Sháhjahánábád mint. His coins are not so common as those of Akbar. In the present collection many more might have been added to the present collection had they been available.

The mints shown in silver are :—Sháhjahánábád, Khujasta, Nárnol, 'Azimábád, Tatta, Sarhind, Cuttack, Láhor, Lucknow, Mustaqir-ul-Mulk, Allahábad, Súrat, Burhánpúr, Ettáwá, Ujain, Islámábád, Multán, Akbarábád, to which Gwálár and Arkot.

There are no copper coins of this king in the present collection.

Rafi'a-ul-Darajat.—This king reigned only a few months. Two gold coins and one silver coin are in this collection from the Kábul and Multán mints, both of which are represented in the British Museum collection in either gold or silver. The silver coins in the present collection are Gwáliár, Láhor, Akbarábád, Zinat-ul-Balád, and Etching his

Rafi'a-ud-Daulat, Sháh Jahan II.—This king reigned only a few months of the year in which Farrukh Siyar died, 1131 H., and in which Rafi'a-ud-Darajat reigned. His coins are not uncommon. In the present collection one gold coin from the Sháhjahánábád mint, and in silver the following mints are represented, his Láhor, Islámábád, Tatta, Barelli, Sháhjahánábád, and Indarpúr.

Muhammad Nekoeiyar.—This king may have struck the coin on which the couplet

سکه زد در جهان بلفظ الله

Who struck the coin with the following variant of this couplet is uncertain

سکه زد از فصل الله
بادشاه زمان محمد شاه

The last line being the same would seem to suggest the same king, but the coin seems to favour Muhammad Sháh whose coins we are going to discuss.

Muhammad Sháh.—Muhammad Sháh coined very extensively in gold, silver, and copper. The present collection has, however, no gold coins of his. The silver coins have been increased indefinitely. After the first year the Dehli coins have been issued with the Hijri year. A formula with the regnal year and mint occupy the reverse. Other mints besides the Dehli mint are 'A and Láhor, Akbarábád, Gwáliár, Ajmír, Sarhind, Sháhjahánábád, Burhánpúr, naggar Ondh, Barelli, Korá, Ahmadábád, Kashmir, Muhammadábád Banárá, láhábád Qanauj, Pesháwar, Multán, Ettáwá, Jaipúr, Dera, Attock, Farrukhábád, and Islámábád. In copper the mints are Multán, Kábul, Kashmir, Bhakkar, and Pesháwar.

Muhammad Ibrahim.—This king is represented in the present collection by one rupee of the Sháhjahánábád mint. On it comes portions of a couplet:—

سکه زد در جهان بفضل كوريم
شاه شامان محمد ابراهيم

as this couplet has been rendered differently more specimens are required.

Ahmad Sháh Bahádur.—Ahmad Sháh began to reign about the same time as his formidable rival Ahmad Sháh Durráni. He is known on his coins by the name "Bahádur," whilst the Durráni Ahmad had a Persian couplet on his coins.

are no gold coins of Ahmad Sháh in this collection, neither are there any in copper. The mints of the *silver* coins are Sarhind, Muhammadábád Banáras, Láhor, Sháhjahánábád, Islámábád, Sarhind, Farrukhábád, Kálpi and Jandhpúr.

'*Alangir II.*—'Alangir II, coined in gold, silver and copper. His gold and silver coins exhibit several varieties of inscriptions. One is a couplet:—

بزر زد سکه صاحب قرآنی
بهادر شاه عالم گیر دانی

See coin (3).

the common legend is—سکه مبارک بادشاه غازی عالم گیر. See coin (1). On coin (8) we find the Kalima once more on the reverse and with it the Hijri year, and the names, &c., of Muhammad's Four Companions. On the obverse is:—

سکه مبارک ابوالعدل غزیز اددین بادشاه غازی محمد عالم گیر

and in the margins the mint name and year of accession. The mints named in the present collection, are Sháhjahánábád, Akbarábád, Sarhind, Burhánpúr, Kashmir, Muhammadábád Banáras, Ahmadnagar, Farrukhábád, Najibábád, Indarpúr, and Láhor. On the copper coins are only Láhor and Sháhjahánábád.

Shah Jahán III.—This king is represented by two coins in this collection, one in gold from the Indarpúr mint and one in silver from the Ahmadnagar-Farrukhábád mint. The former is dated 1174, the latter 1173.

Sháh 'Alam II.—In the time of Sháh 'Alam II, who reigned nominally nearly 49 years, the empire founded by Bábar, went altogether to pieces. Coins were nevertheless struck in his name in the three metals in many parts of the Empire. There is great variety in the inscriptions. One gold in the present collection from the Sháhjahánábád mint has the following couplet:—

سکه صاحب قرآن زد ز تائید اله
حلمی دین محمد شاه عالم بادشاه

on the silver coin No. (1), this is changed for

سکه زد بر حقیقت کشور آریه فضل اله
حلمی دین محمد شاه عالم بادشاه

به is sometimes changed to *سایه*. See coin [17]. Some coins have no couplet, but simply سکه مبارک شاه عالم بادشاه غازی. (See coin [12] silver.) The mints mentioned on the *silver* coins are Akbarábád, Muhammadábád Banáras, Sháhjahánábád, Aonla, Ahmadnagar-Farrukhábád, Indarpúr, Murádábád, Muhammadnagar, Dingarh, Korá, Dár-ul-Bast, Jummún, Najafgarh, Barellí, Saháranpúr, Najibábád, Hardwár, Muzaffargarh, Jaipúr, Arcot, and Maisore. In *copper* the following mint names come, Najibábád, Sháhjahánábád, Bindrában, Mominábád, Saháranpúr, Kachrowlie, Baroda, Bhakkar, Islámábád and Akbarábád.

Many of the coins of Sháh 'Alam II are of remarkable beauty. The East India Company struck coins in his name, but only a few of these are given in this collection, those like the native issues of previous kings.

Bedár Bahát.—This king made an attempt to reign in 1202-3. There is only one

coin of his in this collection, a gold one of 1203 from the Muhammadábád mint, and bearing the following couplet :

بزرگسکه زد ولی تاج و تخت
شاه جهان محمد بیدار تخت

Akbar II.—Akbar II had for his empire the Fort of Dehli, nevertheless he issued coins, and coins were issued bearing his name by rulers of Native States. In this collection are two beautiful mohurs from the Sháhjahánábád mint. The silver coins are from the mints, of Sháhjahánábád, and Brij Indrapúr; the copper coins have these mints : Sháhjahánábád, Jaipúr, Ahmadábád, and Firozpúr. The broad rupees issued by the king are of great beauty and rarity.

Bahádur Sháh II.—The last of the house of Bábar who sat on the throne in Dehli, coined but a few rupees in the Dehli fort. There is only one in this collection which was struck in the sixth year of his reign in 1258 H. = 1842 A. D. Native princes coined in his name. I have seen no copper coins of this Emperor; none were needed, as the country was flooded with the *paiss* of the East India Company.

The number of coins in the present collection is somewhat large. They may be classified thus :—

Grand Total, 1,816 coins, of which 1,559 are Mogul coins and 257 Súrí.

In the absence of mint records the coins themselves afford ample information as to where the mints were and the kind of coins struck in each, so that the title of this catalogue might be "Coin Records of the Mints of India from the time of Bábar to the extinction of the Mogul Empire." The description of coins not in this collection would be out of place here somewhat, as it belongs more to a general history of the numismatics of the Moguls. Hence it is I do not give the lists of coins, said to have been struck, given by the *Áin-i-Akbarí* and *Tozuk-i-Jahángírí*.

The mint names on the coins taken together with the years make the coins a good gauge of the extent of the Mogul Empire at different stages of its existence. Were any one to collect all the years he could, which occur on different mints, he would have a perfect gauge. In the present collection something like this was attempted, but the means were not at hand whereby so large and perfect a collection could be made.

Many of the names of the mints are well known. Others are not now known at all. Often, as we see from the coins, the names of places were changed, thus Udipúr was called Muḥammadábád and so was Kálpí. Amongst the mints of Akbar, Gobindpúr, Sherpúr, and Akbarpúr are uncertain. Laháj Bandar is the name of an old port in Sind. Sítpúr is the name of an old town in the Muzaffargarh District of the Panjáb. Shergaph'urf Qanauj is quite correct, there is a fort of Shergarh near Qanauj. Some of Jahángír's mints are not known, such as Jalair, Zafarnagar, Panjnagar. 'Zafar' meaning victory, any place where a battle was won might be called Zafarnagar, Zafarpúr or Zafarábád. Nearly all the mints of Aurangzeb are known. Alamgírú is probably in the Montgomery District, for it was the name of a parganna in the Bári Dúáb made by Aurangzeb. (See *Gazette of Panjáb*, Montgomery District, p. 29.) The "Zinat-ul-Balád" has no town's name attached to it on the coin of Rafi'a-ud-Daraját, so it is not known. Of Islámábád the idea is that, it is another name for Chittagong, but it is also another name for Mathura. (*Arch. Reports*, Vol. XX, p. 39). But Chákná was also called Islámábád (*Elliot*, Vol. VII, p. 263). It is almost impossible to decide which is the Islámábád of the coins. I incline to Mathura, for it is almost impossible for rupees struck at Chittagong to have found their way into the Panjáb.

The titles given to towns are noteworthy. I have already noticed that Champánir was called Shahr-i-Mukarram and Jaunpúr Khitta-i-Mutabarak. Dehli was called Hazrat, and Dár-ul-Mulk Hazrat, and Dar-ul-Khiláfat Sháhjahánábád; Láhor was called Dár-us-Sultanat; Kábul Dár-ul-Mulk; Barhánpúr was called Dár-us-Sarúr

and Baldat-i-Fákhira; Ujain, Dár-ul-Fath; Bijápúr, Dár-uz-Zafar; Surat, Bandari Mubarak; Jaudhpúr, Dár-ut-Tusawwir; Agra, Mustaqir-ul-Khiláfat Akbarábád; Patna, Mustaqir-ul Mulk 'Azimábád; Banáras was called Muḥammadábád; Dár-ul-Khiláfat was used with Láhor, Agra, Sháhjahánábád, Jaunpúr, Lucknow, and Dogám, which latter place was also called Dár-ul Islám. Multán, Agra and Jummún were all styled Dár-ul-Amán. Dár-us-Sultanat was given to Fathpúr and Aḥmadábád as well as Láhor. Dár-ul Zarb, goes with Patna and Kálpí and Aḥmadábád.

There are many minor points which might be taken up and worked out. Those already noticed, however, will suffice to show that the study of the coins of the Moguls is one full of interest. To the student of the history of the period it is one of necessity, not only for the sake of illustration and confirmation of facts, but for clear and distinct views about the fluctuations of the extent of the Empire. To the numismatist pure and simple, it is one of absorbing interest from the amount of information each coin gives.

This collection having been made by one man who possessed but little wealth and had little time at his disposal, and who had, moreover, few chances of travelling from one city to another, shows what may be done in the matter of the coinage of the Moguls. The coinage of other dynasties who have ruled at different times in various parts of India needs to be treated similarly.

AMRITSAR, }
December 1892. }

CHAS. J. RODGERS,
Honorary Numismatist to the Government of India.

NOTE.

The following is a catalogue of the Mogul and Súri coins collected by Mr. Chas. J. Rodgers, Honorary Numismatist to the Government of India, and sold by him to the Panjáb Government of India. These Mogul and Súri coins form about one-fifth of the whole collection numerically. There are amongst them many coins altogether new to numismatics. The collection is especially rich in copper coins; the silver coins are about five-ninths of the whole. Many mint towns are represented in this collection. The collection cannot vie with that in the British Museum in the matter of gold coins, but it has seventeen times more copper coins in it, and considerably more silver coins. The many varieties of copper coins, the number of couplets on the silver and gold coins, and the great number of mints will deepen the interest of numismatists in the coinage of one of the largest empires of the world.

The collection was made by a private individual in his leisure hours, during a residence in Amritsar of more than a quarter of a century. It is a pleasure to him to know that these numismatic treasures will find a home in the New Museum at Láhor, and perhaps be studied by the intelligent students who year by year are leaving the Panjáb Colleges, and of whom many are taking a deep interest in the History of India, and especially of that most historic province of India, the land of their birth, that of the five rivers—the Panjáb.

0.97	The other side is like the obverse of (19), but the margin seems to be non- sense. It is evidently a forgery of the time of Bābar and two dies both of the obverse of different coins were used in striking it. The plating is worn through in places.	

32

69·0 An electrotype of a coin. The original was probably one of Shāh Rukh's.
0·9 It has been twice counter-struck. One striking is illegible, the other is in a heart-shaped area and reads ظهير الدين محمد باير.

Nearly all these 32 silver coins are new to Numismatics. Thomas gives two coins, both without mint and date. (No. 323 and 4, Plate V, No. 172 and 3), Marsden has none. In J. A. S. B. Vol. XLIX, Part I, 1880, Pl. VI, fig. 9, is one like No. (14) of the present list.

The unit of the year on these Mandú coins is not plain. As, however, the large coins were struck there in 942 it is probably these were also. There is some doubt also about the word Mandú. On comparing the three coins, I think the name must be Mandú. They are new to numismatics.

* While these sheets were passing through the press, I obtained a new coin in copper of Sher Shah which I give to the collection. It weighs 63 grains. The legends on both sides are similar to those on 108 and 109, but they are enclosed in a hexagon with incurving sides and the date is apparently ٩٤٥ (945 H.) This coin is too light for a quarter of dām. It is not rubbed or worn at all. It would do for the fifth of a dām. Its early date would indicate that it was struck before Sher Shah had made his coinage system.

"In Ābān month, in Āgra, the Lord Almighty's shade.

King Nūr-ud-dīn, Jahāngīr, king Akbar's son, this mohur made."

This is perhaps the most exquisite of Jahāngīr's gold coins. (One other known like this.)

"King Nūr-ud-dīn, Jahāngīr Shāh, the great king Akbar's son.

Struck coin in Royal Āgra,—refuge, to which all run."

In the field of this beautiful mohur are volutes of vines with flowers and leaves.

"The gold of Āgra, in Farwardīn, like stars bright shone.

From coin of Jahāngīr king, the great king Akbar's son."

----------------------	---	---

I am not satisfied with the reading here given. This and No. (176) are the only two rupees I have as yet seen of this type. I translate the inscription:—"May the coin of Aḥmadábád be beautified by the name of Núr-ud-Dín Sháh Jahángír."

176 176-0 0-8	As on (175), but month اذر	As on (175), but year ۱۰۲۶ (Aḥmadábád, 1026 H., Azr).

It would have been impossible to read this coin without the aid of (122). It was struck from quite a different die; the letters are stiff: those on (122) are very graceful.

178 173-5 0-78	As on (39).	<p>صلا مهر (اله) احمد ا... ضر... (Aḥmadábád, no date or year, Mihr). This is a very poor rupee.</p>

----------------------	--	--

This rupee is *unique*. It helps in reading (143). I have never seen or heard of other Súrat rupees of Jahángír, except those with the name of Núr Jahán on them.

Smaller Silver Coins of Jahángír.

180 115·0 0·74	غازے جہانگیر بادشاہ محمد نور الدین ۱۰۱۵ سنہ امرداد	The Kalima, and under it— ضرب کابل ۱۰۱۴ (Kábul, 1014 H). The obverse has 1015 H., Amardád !!
181 115·0 0·77	As on (180), but سنہ ۱, and no month given.	As on (180,) but ضرب omitted, and year ۱۰۱۵. (Kábul, 1015 H., 1st year).
These two coins seem halves of the very heavy rupees of Jahángír.		
182 101·0 0·75	As on (180,) but word سنہ omitted, and no year or month.	As on (180), but only بل besides the Kalima. This shows that this coin was struck in Kábul.
The letters on these three coins, 180-182, are very stiff and ugly.		
183 101·0 0·71	As on (180), no year, or month.	The Kalima and ضرب لاہور ۱۰۱۵ (Láhor, 1015 H).

These two coins have been struck on old Súrf dāms. On (5), there is no letter visible of the obverse that has to do with Jahángír. It reads, &c., *ابوالمظفر اسلام شاہ*. The reverse of (5), too, has the lower part of Islám's dām's reverse legend. No. (3) looks also as if it had been struck on a dām. Of (4) and (5) there is no doubt.

--------------------	---	---

N. B.—This is the first appearance, so far as we know, of the word ہجری (Hijri), on any coins of India. It is probably put on the coin on purpose, to distinguish the year from the *Ilâhi* (divine) year of Akbar and Jahángir. We shall see that Sháhjahán also used the *Ilâhi* year.

This is the first Sháhjahánábád rupee in this collection. Ever after this Delhi is called Sháhjahánábád. The couplet means, "May the coin of Sháhjahánábád be current in the world for ever, by the name of the celebrated Lord of the Conjunctions." The rupee is, unfortunately, somewhat rubbed, but every letter is legible.

This *unique* coin is the only square silver coin of Aurangzeb, known. It is called a "legal drachm." It was struck at Lahore, in his 24th year, 1092 H. Marsden gives a "legal drachm" struck at Kuttaek, but with no Hijri year, only the year of a reign 29. Pl. LVII, MCCCXXIX. As he gives 1202 H., he evidently considered it one of Sháh 'Ālam II.

This has been read by Mr. Delmerick thus :—

سکه زد در جهان بفضل کریم
شاه شاهان محمد ابراهیم

Mr. Stanley Lane Poole, in the British Museum Catalogue, reads it thus :—

سکه بر سیم زد در جهان
بفضل محمد ابراهیم شا شاهان

In this couplet as the word کریم does not come in, there must be some mistake.

I prefer Mr. Delmerick's rendering of the couplet.

(Akbarabad, 1st year, 1203 H).

The author of the *مختصر سیر گلشن ہند* gives, at p. 96, the couplet—

سکہ زد در جهان ز فضل الہ
حامی دین محمد اکبر شاہ

as one of Akbar II, but the year he gives is ۱۲۲۲, whereas the year on this rupee is distinctly ۱۲۰۳, and the mint is Akbarabad. Until other specimens of this rupee are found, I must hesitate to assign it to any king with certainty. If it be one of Akbar II whose name it bears, the date is wrong by nearly twenty years.

INDEX OF MINT TOWNS.

The names of the mint towns in this Index are arranged after the order of the letters in the English alphabet.

As the whole catalogue is arranged chronologically there is no need for an Index of the years.

There are many mints known, not in this catalogue. There are many coins known from many of the mints in this catalogue, hence in order to trace the growth and disintegration of the Empire other catalogues should be consulted.

Some new readings of mint names will be found in this list. They have been made from the coins, and are the result of much research.

There are several mints, new to numismatics, here given.

The chief feature is the number of Copper Coins. These have, as a rule, been described in groups. Full particulars of each coin will be found in the catalogue. In this Index only the copper coins with mint names on them are noticed. There are many interesting coins without mint names.
